PROPOSED AMENDMENTS TO CLAIM 1

1. *(Currently Amended)* An electronic game card comprising:
 - a planar card having three or more sides and a top surface, and forming a platform for holding a detachable thin cover card;
 - controller means in the planar card;
 - one or more communication means in the planar card and coupled to the controller means, wherein the communication means further include means for allowing communications between adjacent cards when two cards are placed close to each other, with one side of each card opposite a side of the other card;
 - user input means coupled to the controller means; and
 - a code reader coupled to the controller means and configured to read a card code from the detachable thin cover card coupled to ~~[[a]]~~ the top of the surface of the planar card;wherein the planar card is generic and the thin cover card contains electronic coded description thereof.
